

Traffic Pedestrian Counting

Centre Traffic Statistics

If your world has become the world of "numbers of people serviced" over a given amount of time, then Centre Traffic Statistics is your measuring stick.

Whether you are a hospital, airport, shopping center, library, or retail establishment, you need to know how many people came in through your doors and compare that to the number you serviced.

Once you have that information you can calculate your "sell-through" percentage, determine your peak hours for better staffing and even whether or not a promotion you had provided the increase in traffic that you were looking for. Budget constraints, Centre Traffic Statistics can provide you with the statistical proof of what is actually happening.

Centre Traffic Statistics is the brains behind the brawn. Advanced Alarms Ltd. Innovative, leading-edge hardware solutions do the work, while Centre Traffic Statistics affords you the ability to understand what is going on, hour by hour, day by day, week by week and year by year, all automatically. Your only function is to produce the reports, and that is it: simple and elegant.

- **Monitors unlimited entrances**
- **Reports by entrance, by day, by week, by month or year**

Good Security Starts With Just Good Common Sense.

Company

Advanced Alarms Ltd. is a U.L.C. listed company that has been providing electronic security detection services to individuals and businesses for over 18 years. Based out of the Greater Toronto Area, we can provide complete security services for a wide variety of industries ranging from retail, jewelry, finance, and commercial, industrial and residential.

Intrusion Alarm/ Monitoring

From residential security systems to large industrial yard perimeter detection, we provide solutions for it all. Advanced Alarms provides U.L.C. listed systems to satisfy insurance requirements in the drug store and jewelry industry and can come up with a resolution to any problem encountered. We are most often more reasonably priced than your existing monitoring company and can switch your services with no activation fees.

Video Surveillance/ CCTV

Video surveillance provides the ability to view and record events as they happen on your site, 24 hours a day. For added convenience off site viewing and search is available

Theft deterrence and video evidence for property crime and staff accountability.

Less obvious uses are integrating point of sale systems to help track cash and inventory.

U.L.C. Fire Signalling/ Critical Condition Monitoring

Advanced Alarms provides fire system signalling and monitoring services following U.L.C. standards. We can also provide monitoring services for critical conditions such as:

- Temperature
- Flood/Moisture
- Control Parameters
- Freezer Defrost

Card Access

It is simple. Save the re-keying process and retain a detailed report of your employees entrance. The initial higher cost of using card access is recovered over time and provides enhanced security to your premise. Integrated with your intrusion alarm, simple to use software can provide you easy and instant access to control your security.

Telephone System

Multi line systems available with integrated music on hold, paging, and background music.

All cabling installation and setup is available.

Data/Networking

Providing data cabling and network setup we can assist you with your network needs.
